

# AO SCAN DIGITAL BODY ANALYZER

***Congratulations*** on taking another step toward your overall health and wellbeing with the

## ***AO Scan Digital Body Analyzer!***

One of my goals as the proprietor of Beyond Body European Massage Therapy is to offer a variety of services to improve the “whole” person and to empower my clients to have an invested interest in their own health and wellbeing. To that end, I strongly encourage you to **visit [www.aoscan.com](http://www.aoscan.com)** to familiarize yourself with the plethora of information this scan can provide you.

As with most treatments, one session is not enough to see or feel a lasting result. It takes at least five sessions to identify changes or improvements. As a result, I am offering a package of 5 scans for \$275.00 (\$55/scan) regular \$85 or 10 scans for \$550.00. If you just want to try one session with that amazing technology your payment will be \$85 (includes scan, treatment, emailed reports, 30min Consultation to review results).

At our initial session, you will receive the following:

- An overview of AO scanning (how it works, benefits, outputs, etc.)
- Three (3) scans and three (3) treatments:
  - Inner Voice
  - Vitals Scan
  - Comprehensive
- Emailed reports from all three (3) scans
- 30-minute Consultation (at or after the initial session) to review results

To make our consultation fruitful, it is highly recommended that you review **aoscan.com**. The Home page explains each scan and the numerical values associated with the outputs. The “Explore” option provides detailed explanations of every organ, artery, body part, etc. that the scan assesses.

During the consultation, I will answer any questions and provide an explanation of the reports including how to read the reports and how to compare reports after future scanning sessions.

Subsequent sessions will include the three (3) scans and three (3) treatments along with their corresponding reports. Since you learned how to read and compare the reports at your initial consultation, a subsequent consultation is not necessary. However, should you like additional consultations at any time, I am offering 15-minute intervals for \$1/min.

I am confident adding AO scanning to your current treatments will enhance your wellbeing and overall health.

Be well,  
Alexandra
